ADVANCING YOUR SAFETY

PRODUCT CATALOG EDITION 4

OUR STORY

Founded as a protective equipment task force in the 1970's, we have grown far beyond simply manufacturing products. We protect you for life's best moments.

Fueled by our R&D Special Ops Unit, comprised of the world's most bold and pioneering industry designers, users and advocates that revolutionize product innovation. We are fully dedicated to helping build a better future for the new generation of elite industrial troops; those who risk their lives so that future generations can thrive, rather than survive.

Enter the RPB® armory. The world's most advanced front-line armor for industry professionals consisting of supplied and powered air respirators, air monitoring, filtration and safety essentials, rigorously engineered resulting in leading protection, communication and optical technologies.

GLOBAL NETWORK

RPB® has a global network of distributors serviced from our Michigan Head Office and satellite offices in New Zealand and the United Kingdom.

Contact us on **(866) 494-4599** (USA), **+1 (248) 591 4000** (International) or visit **rpbsafety.com/find-your-distributor/** to find your nearest distributor.

RESPIRATORS

Z-LINK®

ELITE MULTI-PURPOSE RESPIRATORY PROTECTION

Z-LINK®

ELITE MULTI-PURPOSE
RESPIRATORY PROTECTION

The RPB® Z-Link® is more than a product. It's a system. The most versatile multi-purpose respirator on the planet. From welding and grinding to chemical handling, the Z-Link® serves the widest spectrum of industries and applications on the market.

The Z-Link®'s large visor enables you to operate with a widened perspective. It features exceptional downward and peripheral vision combined with a visor that hinges open for free air breathing and easy communication. Engineered to advance your safety. Designed to increase your productivity.

Inspired by military innovation, our R&D Special Ops Unit has relentlessly refined every last detail. The team has traveled the world to meet with and listen to operators. Ultimately, these refinements have enabled RPB® users to work smarter, not harder. Save crucial energy, time and costs in competitive industry environments, where elite protective equipment is often overlooked.

The Z-Link® is certified to the standards below and conforms to AS/NZS 1716:2012, AS/NZS 1336:2014, AS/NZS 1801:1997.

SUPERIOR COMFORT
The first padded multi-purpose respirator on the planet. A fully-adjustable Comfort-Link™ Fit System allowing for total control on helmet and head placement including the 360-degree adjustable head band and reversible brow pad.

Visor hinges open.

Air deflector for airflow adjustment.

Choice of 6 Anti-Fog and Scratch Resistant ANSI Z87+ visors: Premium Clear, Green Tint (Shade 3), Green Tint (Shade 5), Yellow Tint, Black Tint and Mirror Tint.

Reversible brow pad allows the choice of soft touch (smooth) or optimum comfort (fluffy) finish.

3 cape materials available: Tychem® QC, Tychem® SL or Zytec® FR.

Fixed jaw ensures secure cape attachment.

Z-LINK+®

ISO9001
CERTIFIED COMPANY

ELITE MULTI-PURPOSE RESPIRATORY PROTECTION

The RPB® Z-Link+® is the result of extensive user testing in demanding welding environments. Elite welding professionals benefit from reduced downtime and fatigue and increased productivity.

As the Z-Link+® clips directly onto your main visor, you can seamlessly weld with crystal-clear vision and the ability to lift up your visor to check welds and instantly begin grinding.

The Z-Link+® includes the large RPB® ADF lens with the 1.1.1.1. rating in optical quality. The all-important fourth "1", advanced angular dependence control, guarantees uniform shading and distortion-free vision, allowing you to work comfortably and effortlessly for hours across different angles.

The addition to the Z-Link® certifications, the Z-Link+® is certified to the standards below.

Z3™ WELDER

ULTIMATE RESPIRATORY PROTECTION & OPTICAL QUALITY

Protecting you for life's best moments®

Z3™ WELDER

ULTIMATE RESPIRATORY PROTECTION & OPTICAL QUALITY

As the predecessor to the new, multi-purpose Z-Link+®, the RPB® Z3™ Welder combines respiratory protection with breakthrough optical technology.

Proven to deliver welding professionals with a comfortable working environment, the Z3™ Welder exceeds the demands of the most quality-conscious companies, while surpassing the most rigorous industry standards.

Advance your workplace safety with a product that boasts a range of truly unique design and engineering features. The Z3™ can withstand extreme temperatures without distortion due to the high performance nylon shell construction. The adjustable airflow disperser means that you can operate in a comfortable and fume-free breathing zone.

The Z3™ Welder includes the RPB® OCV filter with advanced angular dependence control providing uniform shading and distortion free vision to work comfortably across different angles. It features superior color definition in both open and activated states, allowing you to easily identify heat definition and displays on equipment.

The Z3™ has been rigorously tested through conventional safety testing methods in addition to field testing. It certified to the standards below and conforms to AS/NZS 1716:2012.

Z3™ WELDER

OPEN STATE
RPB® OCV COLOR DEFINITION
The OCV Filter range offers superior color definition in both the open and activated state, allowing the operator to clearly see LED displays on machines and equipment, as well as heat definition on the actual weld.

RPB® OCV FILTER — Sensitivity, Shade, Delay

STANDARD FILTER

CLOSED STATE
RPB® OCV OPTICAL QUALITY
The OCV filter boasts a 1/1/1/1 optical quality rating which is the world's best. This means a clear view from a wider range of angles, reducing eye fatigue and increasing your productivity.

RPB® OCV FILTER — Sensitivity, Shade, Delay

STANDARD FILTER

40% MORE VIEWING WITH THE RPB® OCV ULTRA ADF (110X110)

- Viewing Area: 10.1 square inches (3.78" x 2.68")
  Light state: Shade 4. Dark state: Selectable shades 9-13
- Fast, reliable switching speed: 0.15ms at 73ºF / 23ºC
- Adjustable delay from dark to light (0.2 to 0.8 seconds)
- Weight (ADF only): 5.64 oz / 160g.
  Temperature range: 14ºF to 140ºF / -10ºC to +60ºC
- 3 year warranty
- 2 Sensors: it is the quality not the quantity of sensors that provide the fast reaction time of the filter
- Sensitivity and delay adjustment on case
- Highest quality wide view ADF available
- Constant UV/IR protection
- Accommodates standard 4" x 5" front cover lens
- Adapts to standard magnifying lens
- Solar powered
- Best optical quality in industry - 1/1/1/1 DIN Rating
- Suitable for all types of electro-arc welding, including covered electrodes, MIG/MAG, TIG/WIG, plasma welding and cutting. **NOT FOR LASER OR GAS WELDING.**

Z100™ SERIES

LIGHTWEIGHT PROTECTION
WITH SAFETY AT THE FOREFRONT

Z100™ SERIES

LIGHTWEIGHT PROTECTION
WITH SAFETY AT THE FOREFRONT

The RPB® Z100™ Series is the leading cost-effective replaceable and disposable armor on the market.

The Z100™ is manufactured from RPB® Zytec® Fabric. It is a lightweight hood that offers superior comfort in comparison with conventional, tight, full-face respirators. The hood protects the operator's entire head, eliminating the need for a head sock.

Used throughout a variety of industries from grinding to brazing, the Z100™ is equally lightweight as it is economical. Without incurring significant additional expenses, operators benefit from the Z100™'s advanced safety and superior quality while increasing productivity.

Additionally, users with facial hair commonly convert to this loose-fitting respirator, without jeopardizing or compromising on protection.

NIOSH

TYPE C SUPPLIED
AIR RESPIRATOR

Loop allows for
easy storage.

Air duct directs the airflow to
the operator's breathing zone.

Quick release
breathing tube clip
provides security and
is easily replaced.

Large lens,
providing excellent
peripheral and
downward vision.

RPB® Zytec®
flame resistant
material designed
for use in extreme
environments.

Extra tuck in collar
to direct the airflow
over the upper
body, providing
additional comfort.

Made in USA.

SAVE TIME & MONEY
With the loose-fitting Z100™ Respirator, there is no need for time consuming fit testing, saving you time and money while maintaining OSHA compliance.

NOVA 3®

THE WORLD'S MOST ADVANCED HEAVY INDUSTRY RESPIRATOR

NOVA 3®

THE WORLD'S MOST ADVANCED HEAVY INDUSTRY RESPIRATOR

The verdict is in: the RPB® Nova 3® respirator has been heralded as the industry's definitive benchmark in abrasive blasting.

With breakthrough protection technology and previously unseen advanced comfort and functionality features, the Nova 3® is designed to advance safety and productivity.

For over 40 years, users have been choosing RPB® respirators as the most comfortable across a number of industries. Operators claim the Nova 3® is the lightest and most comfortable heavy industry respirator they've ever used. It's unique weight distribution design distributes the helmet's weight evenly across the head and shoulders for optimum comfort and movability.

A ratchet adjustable neck pad ensures appropriate head support. The molded inner 'Clever Fit Padding' design (patent pending) helps absorb sound, protect hearing and is fully adjustable. It allows for unique customization to correctly fit all users and is easily removable and washable.

Although many claim safety is paramount, we walk the talk. The Nova 3® has been rigorously tested in both controlled and field testing environments - the results speak for themselves. It is certified to the standards below and conforms to AS/NZS 1716:2012, AS/NZS 1336:2014, AS/NZS 1801:1997.

BOOST PRODUCTIVITY
RPB®'s NV3-745 cassette lens is a unique system of one outer lens fused with five tear-off lenses which have pre-folded tabs.

Streamlined air system that directs air to the breathe zone, reducing lens fogging and eliminating head chill.

Tough, high-pressure injection molded helmet shell, manufactured from engineering grade nylon.

Light gray helmet surface reflects heat while the vibrant green visor ensures visibility.

Ratchet adjustable padding system creates secure custom fit.

Bellow seal creates a complete barrier to dust and particulates.

Large, glove sized latch that is easy to locate and use.

Large panoramic window that provides optimum downward and peripheral vision.

Clip on cape seal stops abrasives and dust entering the helmet.

Removable visor for efficient lens replacement.

Cape is securely attached with 8 snap fasteners.

Made in USA.

NOVA 3® TALK™

ADVANCED IN-HELMET COMMUNICATION SYSTEM

NOVA 3® TALK™

ADVANCED IN-HELMET COMMUNICATION SYSTEM

Communicate effortlessly and safely with your fellow blasters, pot tenders and team members, without having to stop what you're doing.

The undisputed champion of industrial team radio, the RPB® Nova 3® Talk™ has transformed the productivity, communication and safety of operators and businesses worldwide. The Nova 3® Talk™ is a wireless communication system, ideal for users in remote locations such as crews in tanks, shipyards, water towers and any area that is difficult to access. The Nova 3® Talk™ offers users features that include push to talk simplicity, a noise-cancelling microphone, pillow foam padding, multiple harness options and much more.

L4™ LIGHT

ADVANCED HELMET LIGHTING SYSTEM

Protecting you for life's best moments®

L4™ LIGHT

ADVANCED HELMET LIGHTING SYSTEM

Blasting in the dark can be awkward and dangerous. The RPB® L4™ Light, minimizes workplace safety hazards, reduces downtime and ensures that you have sufficient light.

The RPB® L4™ Light provides a steady, highly concentrated output of light to your field of vision. Its high-powered LEDs produce up to 500 lumens of concentrated light output with a compact, lightweight battery pack that mounts comfortably and securely on your belt.

The L4™ Light features a low-profile design, enhancing operator control with minimum protrusion and mounts securely to the top of the RPB® Nova 3® Respirator, providing light wherever the operator looks, eliminating the safety risks and inefficiencies associated with outdated nozzle lights.

Although applications have expanded since launch, it was originally developed to overcome the global need for light to assist blasters in tanks and other confined spaces where light is scarce.

Manufactured with durable, long-lasting materials.

Mounts directly to the Nova 3® with no modification required.

Efficient, high powered LEDs producing up to 500 lumens of concentrated light output.

Comes with 5 pre-set brightness settings.

EXTRA LONG LIFE
Long lasting Li-ion battery lasts up to 12 hours on a single charge.
Batteries recharge in 3-4 hours. The lightweight battery pack mounts on your belt.

Made in USA.

*From local and globally sourced components.

NOVA 2000®

ADVANCED ABRASIVE BLASTING HELMET

Protecting you for life's best moments®

NOVA 2000®

ADVANCED ABRASIVE BLASTING HELMET

As the predecessor to the Nova 3®, the RPB® Nova 2000® was designed specifically for blasting, focusing on improved operator comfort to boost performance and productivity.

Featuring best-in-class hearing protection with multi-layered sound deadening foam, a streamlined air flow system and an abrasion resistant shell, the Nova 2000® meets worldwide respiratory protection standards including NIOSH, CE and AS/NZS.

Today's high safety standards in industry environments make on-site health and safety a top priority. Non-compliance or outdated equipment can likely result in unexpected costs including business disruption, injuries to valued operators and negative effects on your company's reputation. Year after year, the Nova 2000® has proven to minimize the risks to employees and businesses worldwide.

The Nova 2000® is certified to the standards below and conforms to AS/NZS 1716:2012.

NIOSH	CE 0194	ANSI Z87+	ANSI Z89.1
TYPE CE SUPPLIED AIR RESPIRATOR	EN14594:2005 EN12941:1998+A1:2003+A2:2008 TH3 P R SL	EN166:2002 HIGH VELOCITY IMPACT FOR EYE & FACE	EN397:2012+A1:2012 HARD HAT PROTECTION

BOOST PRODUCTIVITY
Contractors have reported a time saving of over 45 minutes per day per blaster by using the RPB® "Fit & Save™" Tear-off lenses that have individually pre-folded tabs, meaning workers are guaranteed to tear off only one lens at a time.

Air duct distribution system directs airflow into the breathe zone, prevents fogging and keeps workers cool.

Hand strap for easy transportation and storage.

Multi-layered sound deadening foam for hearing protection.

Super tough helmet shell that is U.V. stabilized and abrasion resistant.

Abrasion resistant cape cover band.

Large viewing window for increased vision.

Snug detachable inner bib.

Choose from 5 cape options.

Cape is securely attached with 8 snap fasteners.

Made in USA*

SAFER, TOUGHER & MORE COMFORTABLE

Protecting you for life's best moments®

NOVA 1®

SAFER, TOUGHER & MORE COMFORTABLE

With a robust and large flat lens, the RPB® Nova 1® boasts all the same design features of the Nova 2000® that improve operator comfort and boost productivity.

Featuring best-in-class hearing protection with multi-layered sound deadening foam, a streamlined air flow system and an abrasion resistant shell, the Nova 1® meets worldwide respiratory protection standards including CE and AS/NZS.

Today's high safety standards make on-site health and safety a top priority. Non-compliance or outdated equipment can likely result in unexpected costs including business disruption, injuries to valued operators and negative effects on your company's reputation. Year after year, the Nova 1® minimizes the risks to employees and businesses worldwide.

Between the Nova 3®, Nova 2000®, Astro™ and Nova 1®, RPB® Safety has established itself consistently over decades as the definitive market leader in the abrasive blasting industry.

The Nova 1® is certified to the standards below and conforms to AS/NZS 1716:2012.

ASTRO™

THE LIGHTWEIGHT INDUSTRY BENCHMARK FOR ABRASIVE BLASTING

ASTRO™

THE LIGHTWEIGHT INDUSTRY BENCHMARK FOR ABRASIVE BLASTING

The undisputed economical champion for an abrasive blasting helmet. The RPB® Astro meets safety standards worldwide, including Australia, Europe and the USA.

Weighing only 2.6lb/1.2kg (excluding the breathing tube), the Astro™'s revolutionary lightweight design has proven to reduce operator fatigue and downtime.

For users in search of a flat lens respirator, the Astro™'s best-in-class cape attachment and low lifetime maintenance and parts replacement costs offer users and businesses an unbeatable value and return on investment.

And unlike other flat lens respirator manufacturers, at RPB® Safety, we don't take shortcuts and we refuse to compromise on quality. Our rigorous production standards ensure a robust build and quality from shell to seams.

The Astro™ is certified to the standards below and conforms to AS/NZS 1716:2012.

T100 SERIES™

SUPERIOR LIGHTWEIGHT PROTECTION

T100™ SERIES

SUPERIOR LIGHTWEIGHT PROTECTION

The RPB® T100™ Series is the leading cost-effective replaceable and disposable armor on the market. Maximize your economic return with this supplied air respirator that provides lightweight protection and premium quality.

Used throughout a variety of industries from industrial spray painting to chemical handling, the T100™ has been designed to be robust enough to reuse but cost effective enough to discard after use.

It is manufactured from DuPont® Tychem® and offers superior comfort compared to conventional, tight, full-face respirators. The hood also protects the operator's entire head, eliminating the need for a head sock. And its wide-angle lens delivers optimum vision.

A large variety of hood options with different features are available, including the option of the unique ANSI Z87.1+ High Velocity Impact Lens.

Additionally, users with facial hair commonly convert to this loose-fitting respirator, without jeopardizing or compromising on protection.

APPLICATIONS INCLUDE

■ Spray painting and coating applications
■ Pharmaceutical manufacturing
■ Chemical and pesticide handling
■ Waste management
■ Materials handling and chemical stripping

NIOSH
TYPE C SUPPLIED
AIR RESPIRATOR

The T100™ Series is available in two different materials:

Dupont® Tychem® QC and Dupont® Tychem® SL. Dupont® Tychem® SL is widely used in waste management, hazardous response, nuclear environments, and other challenging industries. This version is Saronex coated, providing at least 30 minutes of protection against over 120 chemical substances.

DUPONT® TYCHEM® SL

DUPONT® TYCHEM® QC

HEAD PROTECTION
For work sites that require head protection, the T100™ offers a ANSI Z89.1 compliant Hard Hat that has a 6-point harness providing excellent stability and comfort. Choose between the head suspension and the ANSI Z89.1 Type 1E Hard Hat.

Air duct directs the airflow to the operator's breathing zone.

Loop allows for easy storage and to keep it free from contaminants.

Barrier seal for more demanding environments, utilizing Saranex™ 23-P film laminated to Tyvek® fabric.

Flex™ breathing tube allows for unobstructed head movement.

Quick release breathing tube clip provides security and is easily replaced.

Peel-off lenses protect the main lens from chemical splash, spray drift and dust.

High velocity impact protection Lens.

Large lens providing excellent peripheral and downward vision.

Tuck in collars provide a seal from airborne contaminants and directs airflow past the upper body to provide additional cooling.

Made in USA.*

*From local and globally sourced components.

T150 SERIES™

THE ULTIMATE AIR SUPPLIED FULL-FACED RESPIRATOR

Protecting you for life's best moments®

T150™ SERIES

THE ULTIMATE AIR SUPPLIED FULL-FACE RESPIRATOR

A limited viewing area is a hazard for employees on industrial work sites, increasing risks such as tripping, falling, or even long-term eye-sight damage. Enter the RPB® T150™ NIOSH approved Type C respirator, which minimizes these risks and offers operators a superior comfort, vision and safety across a spectrum of applications from chemical stripping to spray painting and coating.

The T150™ is manufactured from polycarbonate, making it robust, yet comfortable enough for all-day protection. It has an adjustable six-point harness and a soft silicone or thermoplastic (TPR) face seal that fits perfectly to the contours of the user's face, creating an airtight seal. It also features a panoramic lens that has been specially treated to prevent fog, scratches and acid wear and tear.

When operating in confined space applications requiring a full-face respirator, work in comfort with the knowledge that you and your team are receiving the most elite protection available.
APPLICATIONS INCLUDE

- Spray painting, coating and confined space applications
- Pharmaceutical manufacturing
- Chemical, pesticide and materials handling
- Chemical stripping
- Waste management

NIOSH
TYPE C SUPPLIED
AIR RESPIRATOR

Available in comfortable textile or rubber. Adjustable head harnesses attach via six fast release buckles.

Soft Silicon (green) or Thermoplastic (TPR, grey) face seals guarantee a perfect fit.

Polycarbonate lens protects face from over spray and debris. Its acid-resistant coating allows it to be cleaned with thinners.

Panoramic visor provides undistorted vision.

Air distribution system provides anti-fog barrier to the inside of the lens.

Soft silicone inner face seal fits comfortably over mouth and nose.

BOOST PRODUCTIVITY

Protect the main lens from chemical splash, spray drift or dust with peel-off protective lenses. Pre-folded tabs ensure workers can quickly tear off just one layered lens at a time.

PX4 AIR® PAPR

THE ULTIMATE POWERED AIR PURIFYING RESPIRATOR

Protecting you for life's best moments®
PX4 AIR® PAPR

THE ULTIMATE POWERED AIR PURIFYING RESPIRATOR

The RPB® PX4 Air® is a robust and versatile Powered Air Purifying Respirator (PAPR) that provides clean breathing air to the full range of RPB® Safety's industry leading respirators.

Whether you're welding, grinding, blasting, painting or in a laboratory, the RPB® PX4 Air® can serve all your mobile respiratory needs.

The PX4 Air® optimizes user safety, comfort and portability. Users benefit from the safety of clean breathing air without the restriction of attached airlines, providing complete flexibility to move around as the job requires. It is NIOSH and CE certified and exceeds the requirements of AS/NZS.

APPLICATIONS INCLUDE
- Spray painting, coating and confined space applications
- Pharmaceutical manufacturing
- Chemical, pesticide and materials handling
- Chemical stripping
- Waste management
- And many more!

TH3 P R SL

Air flow filter cartridge condition can be checked with the easy to use flow control tester.

Long life, lightweight, Lithium rechargeable battery. Operates up to 13 hours on a single charge. Has a quick test button to view the current battery charge.

LED DISPLAY
The LED display shows battery life and fan speed. When flow is below the minimum requirements the unit alerts you by an audible and vibrating alarm.

Electronic calibration to ensure optimum airflow.

Two belt options available: standard webbed belt or the Nomax® FR rated belt for use in spark environments.

Audible and vibrating alarm when flow is below the minimum requirements.

The ultra quiet fan operates at a noise level as low as 65dba.

Ergonomically designed, contouring to the operator's lower back.

Ultra-efficient multi-speed German built fan.

Made in USA*

Lightweight at just 2.5lbs (1.13kg).

Highly efficient filter cartridge provides maximum filtration.

GX4 GAS MONITOR®

THE ULTIMATE GAS DETECTION MONITOR

GX4® GAS MONITOR

THE ULTIMATE GAS DETECTION MONITOR

Dangerous levels of toxic gases can cause severe injury or death. The RPB® GX4® Gas Monitor gives you the complete confidence that the air you and your employees breathe is safe.

Gases such as carbon monoxide are invisible to all the human senses, yet are commonly found in industrial premises worldwide. While low-level exposure may not be immediately fatal, ongoing contact at low levels has a cumulative effect, causing serious illness and long-term health concerns. Early symptoms can be mistaken for the flu, headaches or tiredness. It is a serious problem which is commonly overlooked.

The GX4® can detect up to four gases simultaneously. It includes smart device and cloud integration capabilities enabling you to view your air quality from any device, while sensors are displayed online in real time.

APPLICATIONS INCLUDE

- Spray painting, coating and confined space applications
- Pharmaceutical manufacturing
- Chemical, pesticide and materials handling
- Chemical stripping
- Waste management

Connect to the GX4® from your laptop, tablet, phone or even network to view real time data, download logs, alter alarm points and much more.

GAS SENSORS

A range of pre-calibrated gas sensors are available including CO, O_2 and H_2S.
All have a 2 year shelf life.

08-420-01

Complete quick and easy calibration checks with no set points required.

103 DBA staccato alarm.

Illuminated display that shows real time data.

Monitor up to four gases simultaneously.

Robust power inlet.

Sturdy mounting bracket.

Cartridges can be easily removed and replaced.

Push release air inlet.

Strong nylon ABS case that will handle the harshest of conditions.

Made in USA*.

*From local and globally sourced components.

RADEX
AIRLINE FILTER®

ADVANCED FILTRATION CAPACITY & VERSATILITY

Protecting you for life's best moments®

RADEX® AIRLINE FILTER

ADVANCED FILTRATION CAPACITY & VERSATILITY

Polluted air can be the cause of major health issues and, at the very least, can adversely affect operator comfort and productivity. The RPB® Radex® Airline Filter improves the quality of the air your employees are breathing and exceeds industry filtration standards so you can be assured that your operators won't suffer the consequences of breathing contaminated air.

The filter is fitted with a large capacity, 6-stage filter cartridge that removes moisture, odor and particulates to 0.5 micron from the compressed air stream, providing clean, breathable air. The Radex® features a unique twist-and-lock wall and floor mounting system.

An optional auto drain valve is available to fit to your filter that continually removes moisture from the filter housing, increasing the lifespan of the filter cartridge.

Auto drain valve.

6-stage filter cartridge.

6 OUTLET SYSTEM
Upgrade to the 6-outlet system to provide filtration to six separate airlines from one filter.

Quick disconnect coupler that is compatible with brands including Aro, Cejn, Dixion and Rectus.

Outlet pressure regulator provides the ability to adjust air pressure. Range 0-125 psi (04-900 2 outlet unit only).

150 psi safety pressure relief valve.

Claw coupler port.

Replacement filter cartridges have a replacement date sticker for maintenance scheduling.

Wall and floor mounting system.

Fitted with brass drain tap.

Made in USA.*

Strong, robust housing.

*From local and globally sourced components.

C40™ CLIMATE CONTROL DEVICE

PREMIUM AIR TEMPERATURE
CONTROL SYSTEM

C40™ CLIMATE CONTROL DEVICE

ADVANCED AIR TEMPERATURE CONTROL SYSTEM

Working in an environment where the temperature is comfortable is key to maximizing productivity. The RPB® C40™ Climate Control Device can heat and cool your supplied air as desired.

With the slide of a lever, your employees can switch from heating to cooling ensuring they are comfortable whether they're in the searing heat of the Arizona summer, a severe Scandinavian winter or anywhere in between.

The RPB® C40™ can cool incoming air by up to 52°F (29°C) or heat it by up to 33°F (18°C). This is achieved by simply switching the mixing lever from hot to cold. The device is lightweight and ergonomically designed to sit comfortably on the operator's hip. The RPB® C40™ pairs with most of our respirator range.

APPLICATIONS INCLUDE

- Spray painting, coating and confined space applications
- Pharmaceutical manufacturing
- Chemical, pesticide and materials handling
- Chemical stripping
- Waste management

Exhausted air is directed away from the operator's body, eliminating the need for a heat shield or heat resistant clothing.

LOW MAINTENANCE
Low maintenance required. The air silencers are the only parts that need cleaning or replacing.

Increase or decrease the airflow by turning the flow control dial.

Durable belt for maximum comfort.

Lightweight - weighing only 9.8oz (277 grams) excluding belt.

Easily adjust the temperature using this lever.

Manufactured from robust materials, designed and tested for the harshest conditions.

Choose from a range of plugs to suit your application.

Air inlet swivels 360° to ensure the device sits comfortably on the operator's hip.

Made in USA.

* From local and globally sourced components.

FLOW CONTROL

ADVANCED AIR TEMPERATURE CONTROL

COLD AIR TUBE

ADVANCED AIR TEMPERATURE CONTROL

The RPB® Cold Air Tube is part of RPB® Safety's range of economical climate control assemblies. It significantly cools your air supply for optimum performance and comfort when operating in climate and environmental extremes.

RPB® 4000-01 COLD AIR TUBE ASSEMBLY

The RPB® 4000-01 is manufactured from engineering grade plastic which is extremely robust and ideal for the rigors of the workplace. It cools compressed breathing air entering respirators by as much as 32°F(18°C).

All parts are easily removable for maintenance and cleaning.

Strong webbed belt.

Tough engineering plastic designed for harsh conditions.

Regulator to control air temperature and airflow.

Made in USA.
HOT AIR TUBE

ADVANCED AIR TEMPERATURE CONTROL

The RPB® Hot Air Tube is part of RPB® Safety's range of economical climate control assemblies. It significantly heats your air supply for optimum performance and comfort when operating in climate and environmental extremes.

RPB® 4000-20 HOT AIR TUBE ASSEMBLY

The RPB® 4000-20 is manufactured from engineering grade plastic which is extremely robust and ideal for the rigors of the workplace. It warms compressed breathing air entering respirators by as much as 30°F(17°C).

Tough engineering plastic designed for harsh conditions.

Strong webbed belt.

Regulator to control air temperature and airflow.

All parts are easily removable for maintenance and cleaning.

Made in USA.

*From local and globally sourced components.

FLOW CONTROL PARTS

Cold Air Tube Assembly
(NIOSH approved) **Part # 4000-01**
(CE approved) **Part # 4000-01CE**

Regulator Assembly
Part # 4000-11

Cold Air Spinner
Part # 4000-04

Breaker
Part # 4000-07

Hot Air Tube Body
Part # 4000-05R

Silenced Cool
Air Tube Assembly
Part # 4000-40

Safety Quick Release
Tail 1/4" Male Thread
Part # NV2032CE

Regulator Body
Part # 4000-08

Spindle and Knob
Part # 4000-09

Cool Air Tube Body
Part # 4000-05B

Top Thread Cap BSP Thread
(for 4000-01)
Part # 4000-03

Top Thread Cap GHT Thread
(for 4000-20)
Part # 4000-03GHT

Locking Screw
Part # 4000-10

Hot Air Tube Assembly
(NIOSH approved)
Part # 4000-20
(CE approved)
Part # 4000-20CE

FLOW CONTROL PARTS

Hot Air Spinner
Part # 4000-13

Flow Reducer
Part # 4000-14

Outlet Valve
Part # 4000-15

Constant Flow Valve - Low Pressure
Part # NV2015

Flow Control Valve
(NIOSH approved)
Part # NV2016
(CE approved)
Part # NV2016CE

Temperature Shield
Part # 4000-12

Silencer Disc
Part # 4000-16

Silencer Disc - Brass
Part # 4000-16B

Adapter 1/2" Low Pressure Plug
to 3/8" NPT Male Thread
Part # NV2034

Adaptor: 1/4" RPB® Plug to 3/8"
NPT Male
Part # 03-111

Quick Release Tail
1/4" Male Thread
Part # 4000-06

Retainer Nut
Part # 4000-17

Outlet Valve Complete Assembly
Part # 4000-18

Outlet Valve (for 4000-40)
Part # 4000-38

Belt Complete with Buckles
Part # NV2022

Constant Flow Valve - Low Pressure
Part # 03-106

Constant Flow Valve Assembly
(NIOSH Approved) **Part # 03-101**
(CE Approved) **Part # 03-102**

SAFETY ESSENTIALS

BLAST SUIT

ADVANCED COMFORT & USABILITY

Protecting you for life's best moments®

BLAST SUIT

ADVANCED COMFORT & USABILITY

The nature of abrasive blasting creates dangerous environments for operators. The RPB® Blast Suit provides ultimate protection and comfort to the operator, advancing your safety and increasing your productivity.

The blast suit features triple stitching for durability and replaceable knee pads for extra comfort and protection.

RPB® Blast Suit Size Chart (INCH)

SIZE	M	L	XL	XXL	XXXL	XXXXL
CHEST	38	40	42	44	46	48
WAIST	34	36	38	40	42	44
HIP	40	42	44	46	48	50
TOTAL LENGTH	62	63	64	65	66	68
INSIDE LEG	30	30	30	30	30	30

ADDITIONAL COMFORT

Sore knees from kneeling? Try the RPB® unique Knee Pad which insert into the Blast Suits internal knee pockets for maximum comfort.

Robust nylon zipper with protective cover.

Breathable cotton back designed to keep the operator cool.

Elasticated waist for a comfortable fit.

Available in 6 sizes.

Heavy duty nylon for maximum protection to the front of your body and arms.

Optional knee pads.

Adjustable leg cuffs.

SAFETY ESSENTIALS

ADVANCED
SAFETY SUPPORT

SAFETY ESSENTIALS

ADVANCED SAFETY SUPPORT

As you know, it is essential to take care of small details to protect your employees in dangerous environments. How can you be certain that your employees are completely protected? RPB®'s safety essentials range takes care of the details, and are ideal for use in conjunction with our respiratory equipment, ensuring your employees are completely safe, comfortable and productive.

SAFETY GLASSES

The RPB® Safety Glasses advance your safety and increase your productivity as they are protective, comfortable, cost effective and reliable. Three different styles are available, each with either clear or smoked lenses.

Safety Glasses - Clear
Part # 18-221-C

Safety Glasses - Smoked
Part # 18-221-S

Plus Safety Glasses - Clear
Part # 18-241-C

Plus Safety Glasses - Smoked
Part # 18-241-S

Ultra Safety Glasses - Clear
Part # 18-261-C

Ultra Safety Glasses - Smoked
Part # 18-261-S

HEAD SOCK
The RPB® Head Socks provide protection from overspray and dust.
Part # 05-601

S100™ EAR PLUGS
The RPB® S100™ Ear Plugs are manufactured from soft, quality foam. They feature the comfortable "bell shape". NRR 32 decibels.
Part # 18-322

DO-RAG
The RPB® Do-rag is made from soft, breathable cotton fabric, and features a sweat band to keep sweat out of the operator's eyes when wearing a respirator.
Part # 05-613

LEATHER BLASTING GLOVES
The RPB® Leather Gloves are made from premium quality leather with Kevlar stitching for durability. They feature a double layer palm and extra leather strip on the outside for additional protection. The lining is soft and comfortable.
Part # 07-701

Knee Pads
Part # 07-761

Replacement Filter Cartridge (generic)	AFC100
Replacement Radex® Filter Cartridge	APF3100
Inlet Filter Element	9700-01
Exhaust Filter Element	9700-02
Pressure Relief Valve	9700-03
Pressure Gauge	9700-04
Inlet Filter Assembly (includes 9700-01)	9700-08
Exhaust Filter Canister	9700-15
1/2" Hansen Coupler	9700-72AD

AIR SUPPLY

PAGE 178	PART #
1/2" Hansen Coupler	9700-72AD
Quick Release 3/8" Hose Tail	NV2024
Quick Release Coupler 1/4" Female Thread	NV2025
100' Breathing Air Supply Hose 3/8" Diameter (includes Quick Release Fittings)	NV2027
25' Breathing Air Supply Hose 3/8" Diameter (includes Quick Release Fittings)	NV2028
10m Breathing Air Supply Hose 1/2" Diameter (includes Quick Release Fittings)	NV2028CE
50' Breathing Air Supply Hose 3/8" Diameter (includes Quick Release Fittings)	NV2029
3/8" Hose Tail 1/4" Male Thread	NV2033
50' Breathing Air Supply Hose 1/2" Diameter (includes Quick Release Fittings')	NV2035
100' Breathing Air Supply Hose 1/2" Diameter (includes Quick Release Fittings')	NV2036

C40™ CLIMATE CONTROL DEVICE

PAGE 186	PART #
1/4" Plug to 1/4" NPT Male Swivel	03-012-PMS
1/4" Safety Plug to 1/4" NPT Male Swivel	03-022-PMS
U Tube Assembly	03-510
Bottom Case	03-514
Top Case Assembly	03-521
Exhaust Assembly	03-522
Silencer Assembly	03-526
Inlet Collar	03-536
Silencers (pair)	03-537
Belt	NV2022

FLOW CONTROL

PAGE 192	PART #
Constant Flow Valve Assembly (NIOSH approved)	03-101
Constant Flow Valve Assembly (CE approved)	03-102
Constant Flow Valve - Low Pressure	03-106
Adaptor: 1/4" RPB® Plug to 3/8" NPT Male	03-111
Cold Air Tube Assembly	4000-01
Top Thread Cap BSP Thread (for 4000-01)	4000-03
Top Thread Cap GHT Thread (for 4000-20)	4000-03GHT
Cold Air Spinner	4000-04
Cool Air Tube Body	4000-05 B
Hot Air Tube Body	4000-05R
Quick Release Tail 1/4" Male Thread	4000-06
Breaker	4000-07
Regulator Body	4000-08

FLOW CONTROL continued

PAGE 192	PART #
Spindle and Knob	4000-09
Locking Screw	4000-10
Regulator Assembly	4000-11
Temperature Shield	4000-12
Hot Air Spinner	4000-13
Flow Reducer	4000-14
Outlet Valve	4000-15
Silencer Disc	4000-16
Silencer Disc - Brass	4000-16B
Retainer Nut	4000-17
Outlet Valve Complete Assembly	4000-18
Outlet Valve (for 4000-40)	4000-38
Hot Air Tube Assembly	4000-20
Silenced Cool Air Tube Assembly	4000-40
Constant Flow Valve - Low Pressure	NV2015
Flow Control Valve (NIOSH)	NV2016
Flow Control Valve (CE)	NV2016CE
Belt Complete with Buckles	NV2022
Safety Quick Release Tail 1/4" Male Thread	NV2032CE
Adapter 1/2" Low Pressure Plug to 3/8" NPT Male Thread	NV2034

BLAST SUIT

PAGE 200	PART #
Blast Suit size Small	07-755-S
Blast Suit size Medium	07-755-M
Blast Suit size Large	07-755-L
Blast Suit size XL	07-755-XL
Blast Suit size XXL	07-755-XXL
Blast Suit size XXXL	07-755-XXXL
Blast Suit size XXXXL	07-755-XXXXL

SAFETY ESSENTIALS

PAGE 204	PART #
Safety Glasses - Clear	18-221-C
Safety Glasses - Smoked	18-221-S
Plus Safety Glasses - Clear	18-241-C
Plus Safety Glasses - Smoked	18-241-S
Ultra Safety Glasses - Clear	18-261-C
Ultra Safety Glasses - Smoked	18-261-S
